Option

NEW PRODUCT LAUNCH - ADVANCE INFORMATION

Anytronic are pleased to announce a completely new range of 6 channel rack mounting digital dimming and switching systems which will replace our trusty 192 and 194 series. Each version of these robust new dimmers has DMX control as standard, with a second independent DMX input as an option. There are options for one or two analogue inputs or for front panel controls on many models. The informative LCD display and easy to use menu system make the packs simple to install, commission and use.

- Rugged rack mounting steel enclosure with stainless steel front panel
- Cost effective digitally controlled dimming and switching
- 200 to 240 Vac 1/2/3 phase operation with front panel supply phase indicators
- Circuit Breaker protection on each channel, optional Neutral disconnect breakers on all models
- Suitable for resistive and inductive loads above 100 W
- Substantial chokes with current risetime of 170 μ s
- Comprehensive and easy to use LCD display and menu
- Dimming / switching operation selected per channel
- Preheat set per channel
- Maximum level set per channel
- Thermostatically controlled cooling
- Externally mounted electronics protection fuse
- Series 194 mounting options include rack/wall/shelf/and free standing
- XLR and RJ45 DMX connectors on all models
- Optional second DMX input
- DMX inputs protected to DMX512A standard
- one or two factory fitted analogue inputs available 0 to 10 V or 0 to 5 V
- Optional front panel rotary level controls with Master control
- RCD / Isolator on Series 192 available as a factory fitted option
- Series 192 (2U) output options: Hardwired / 12 x IEC sockets / 1 or 2 Socapex / Harting sockets. 6 x Danish sockets
- Series 194 (4U) output options: 12 x 15 A / 16 A CEEFORM / Schuko / French sockets
