IR REMOTE CONTROLLED ANYSCENE

Anytronics infra-red controlled Anyscene can save and recall 56 scenes of DMX data captured from a DMX source. It provides non-volatile storage of 128 channels per scene with scene recall under the complete control of a stylish and easy to use IR remote control unit. Eight different sequences of these scenes can be programmed and then replayed under remote control at an adjustable rate with selectable fade rates to provide continuous dynamic scene changing.

- IR remote controlled DMX512 lighting controller.
- Standard UK single patress wall mounting.
- Single Cat 5 plug in connection for power and data.
- Available with surrounds to match existing electrical hardware.
- Stylish IR remote accesses 28 scenes at the touch of a button.
- Storage for 56 Programmable DMX scenes each of 128 channels.
- Programmable from any suitable DMX source, lighting desk, computer etc.
- Emergency DMX backup feature.
- Remote control of Blackout.
- Remote control of Master level.
- 8 programmable sequences of scenes, each up to length 31 scenes.
- Remote controlled variable speed playback of scenes (5 sec – 1 min per scene).
- Four selectable fade rates (2.5, 5, 10, 20 second fades).
- Memory protect setting preserves existing memory contents.
- 10m remote control range.
